## VALUATION RESOURCES FOR SOLAR PHOTOVOLTAIC SYSTEMS

**DATE:** Wednesday, January 27, 2021  
**TIME:** Check in 8:30 am / Seminar 9:00 am to 1:00 pm  
**LOCATION:** It's Virtual; Participate From Where It is Most Convenient for You

**DESCRIPTION:** Photovoltaic systems, also called PV systems, generate electricity from the sun. When added to a property, PV systems can power home appliances, lights, air conditioning, cell phones, and other electrical devices. There are over one and a half million households, nearly a 2% residential adoption rate, in the United States with solar energy systems, and the number of solar installations is expected to grow exponentially in the coming years. For most appraisers, however, developing the value of solar is a new frontier. But as the demand grows for appraisers who can properly value solar homes, forward-thinking appraisers will have a market edge. They'll be able to differentiate themselves from their peers by serving as a local source of information on solar.

**VIRTUAL OFFERING:** Registrants will connect using ZOOM interactive technology. For the full ZOOM experience, registrants will need a computer, Internet access, webcam, and a microphone. You do not need a paid account from ZOOM to participate. If you are using your iPad/iphone/smartphone, please download the ZOOM app prior to the offering.
